

• Organic

• Natural

**ECOSOIL** is organic fertilizer enriched with Biodynamic products and specific receipt of medicinal herbs and minerals.

We have invested almost 17 years in research, in order to find the most appropriate fertilizer that can provide quality materials and minerals for organic food grow. At the same time we were guided with an objective: assist plants in building stronger immune system that can react and protect them from potentially harmful influences. During this time, many of the ideas were processed and tested in real life but, best results occurred when we started with implementation of Biodynamic products whose influence to organic food grow and soil and plant protection is well known. We made a huge step forward, and start to test different biodynamic tinctures and products combined with our fertilizers in order to improve chances for the plants to grow in better organized environment, utilize positive energy from the outer world to become independent, stronger and bring both better product qualities, not in size increase only, but increase nutrition and energy values, and brings larger yield.

As we all know fields and therefore plants that live in them often need a little boost. Improving the soil is the number one thing you can do to improve your garden, yard or landscape and organic fertilizer can help. Providing quality and natural inputs for the plants, Ecosoil creates safe baseline with significant immune capability so they almost do not need additional treatments. Such passive potential, trigger plants to take all the materials they need directly from the soil, or from the air. Regarding soil itself, our products hill contaminated fields, enrich it, revitalize and by doing this create positive outcome to the environment and make land ready for organic farming. Soils with lots of organic material remain loose and airy, therefore hold more moisture and nutrients, foster growth of soil organisms, and promote healthier plant root development.

Therefore, we have created a completely new line of products that can be used for large and medium scale crops/medicinal herbs farming, but also can be used in husbandry and micro agriculture activities concerning food grow for one family at small piece of land, or gardening organic plants at your yard or even at the apartment, if someone wishes so.

#### GRANULATED FERTILIZER

This one has been build upon well known fact about the Worm Castings as one of the rich digested organic soil that redworms leave behind. Farmers recognize these as the most nutrient organic compost available, cause they retain water and release nutrients within soil, in a form that is easily accessible by plants. We have improved these and enriched it with Ecosoil liquid fertilizer and organic minerals. Beside these we managed to add specific biodynamic products. The pH is neutral and can be used in all type of soils, therefore it's suitable for most types of plants. It contains plant growth hormones.

#### Chemical Characteristics

Nitrogen content	<b>0.5%</b>
Phosphorus content	<b>1%</b>
Potassium content	<b>1%</b>
pH content	<b>6.8</b>
C / N ratio	<b>1:11</b>
Content of organic matter	<b>38%</b>
Contents of mineral matter	<b>62%</b>

#### LIQUID FERTILIZER

This one has been carefully developed with specific ratio of numerous medicinal herbs and Biodynamic products. It may be used to give your plants boost, even every two weeks during the growing season and you may spray all your plants at the same time. Plants can absorb it via their leaf pores and roots. Foliar feeding can supply nutrients when they are lacking in the soil, or when roots are stressed. It is especially effective for giving fast growing plants like vegetables an extra boost during the growing season.

The best times to spray are early morning and early evening, when the liquids will be absorbed most quickly and won't burn/damage foliage. Choose a day when no rain is forecast and temperatures aren't extreme.

**GRANULATED FERTILIZER**

Packaging: 5,10,20, 50l bags, and bulk: jumbo bags 1000l, euro palette or other

**LIQUID FERTILIZER**

Packaging: 0.5, 2, 10, 20l, euro or other palette, and bulk canister 1000l euro palette

IMO approved for use in organic agriculture according to EU Regulation (EC) 834/07 and 889/08
